Work Experience

Google

Seattle, US

SOFTWARE ENGINEERING INTERN

Summer 2017 - Fall 2017

- Provided a full-stack implementation of a tool to support Supply Chain Operations.
- Implemented functionality to add data to requests for tracking particular steps on the installation of machines at Google data-centers.

Yandex

Saint Petersburg, Russia

ANDROID DEVELOPER

Summer 2016 - Summer 2017

- Developed a framework for parameterized integration tests.
- Set up SonarQube for pull request analysis.
- Refactored mail operations to utilize RxJava and Gson.
- Developed a new settings screen for the Android Mail Client.

Kickcity

Saint Petersburg, Russia

ANDROID DEVELOPER

Fall 2016 - Summer 2017

- Developed all front-end part of Kickcity Android app.
- Switched part of the codebase from Java to Kotlin.
- Set up automated testing of the application.

Education

ITMO University

Saint Petersburg, Russia

BACHELOR'S IN COMPUTER TECHNOLOGY ON FACULTY OF INFORMATION TECHNOLOGIES AND PROGRAMMING

Fall 2014 - Summer 2018

- Major — Applied Mathematics and Informatics

Projects

Ambulant Diagnostic

Spring 2015

iOS application that makes use of special health sensors to quickly diagnose a patient and forward the report to a hospital directly from an ambulance car. Developed as a part of JASS — a Russian-German Student School supported by JetBrains.

HTTP Proxy Server

Winter 2015

A fully-functional, cache-enabled proxy server implemented using the latest features of C++11 and C++14. Developed as a final project for a C++ course at university.

Loudly

Fall 2015

Android application that allows sharing your news across the most popular social networks simultaneously.

Extracurricular Activity

Coursera courses

Summer 2017

- Neural Networks and Deep Learning.
- Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization.
- Structuring Machine Learning Projects.

Scientific Experiments App for Bosch

Spring 2016 - Summer 2016

- Developed the UI part of Android app for scientific experiments.
- Provided functionality to build schemes for data processing.
- Implemented components for displaying numerous plots simultaneously.

Skills

Languages	Java, C++, Kotlin, Javascript, Python, Groovy
Frameworks	AndroidSDK, RxJava, Dagger, AngularJS, Gradle
Tests & CI	JUnit, Robolectric, JaCoCo, Teamcity, Travis, Sonarqube
